FOR EXTREME  
TEMPERATURES

SURFACE  
HARDNESS  
37-42 HRC

SALTWATER  
& UNDERWATER  
ENVIRONMENTS

Approved by the U.S. Navy!

**ArmorGalv** is a cost-effective, environment-friendly corrosion protection process that applies a uniform and controlled alloy layer that fully coats both internal and external surfaces with a sacrificial, zinc alloy coating.

It is a superior replacement for zinc plating, cadmium, or hot dip galvanizing that allows for superior adhesion of any top coat (including paint, powder coating, and rubber bonding) while offering superior corrosion, abrasion, and wear resistance.

### Corrosion Resistance

Dry Wet Chemicals Salt Water Acids

### Thickness

Thin Thick

### Uniformity

Even Varies

### Coverage

Poor Excellent

### Wear & Abrasion Resistance

Poor Excellent

### Risk of Hydrogen Embrittlement

Zero High

### Adhesion

Poor Excellent

### Cost
