CUSTOM SOLUTIONS
Let us bag, seal, and label parts in the quantities you want, or create a custom assortment branded with your logo.

MANUFACTURING CAPABILITIES
G.L. Huyett has a complete manufacturing and distribution facility featuring state-of-the-art machinery.

Custom Assortments  Custom Packaging  Custom Marking
Sawing  Milling  Drilling  Turning
Laser Cutting  Surface Grinding  Centerless Grinding  Tumbling
Self-Retaining Threaded Cage Nuts

For quick assembly in blind or center-panel locations, self-retaining threaded cage nuts are available in a variety of materials and finishes. These fasteners install easily with no special tools, provide tight joints, and facilitate easy automation in high volume assembly. They can be found in anything from server racks to appliances.

Features

Free-floating cage nuts are loosely mounted in spring tabs to allow for minor alignment variations.

Nut is retained by spring tabs to allow for ease of use/installation in blind assembly.

Easy Assembly

Place the cage nut on the back of the rail, insert one tab into the hole. Then use a flat-head screw driver or an insertion tool to pry the other tab through the hole. If threads become damaged, cage nut can be easily replaced.

Caution!

Don’t mount the cage nut on the front side of the rail. When cage nuts are mounted on the front side the weight of the attached component rests on the tabs.
